Paid \$: _____ Recieved _____

ActionPix provides a large number of phototts available at a low cost as digital files on a CD/DVD.

We will photograph the performance. The number of photographs will depend on the program Length, Jumps, Spins etc. The photos will not be individually edited - there may be some back views, out of focus or bad pictures, but there will be plenty of good images to choose from.

Your photos will be in JPEG format, suitable for printing pictures up to 8" x 12". For best results, we recommend that you get your photos printed at a high quality photo lab versus a discount outlet. The pictures can be posted to the web, used in email and you may duplicate the DVD.

ActionPix Photography retains Copyright to all images but grants customers a License for unlimited personal use.

Most of the photographs are taken in a portrait orientation. There is a position tag embedded in the images, that allows an image browser to display the photographs in their proper orientation. If the images are viewed in Windows Picture and Fax viewer, they will be displayed on their side. Either right click and rotate the image, or download a free image viewer - Picasa 3 from Google or IrfanView Graphic Viewer
